

VIKINI

Fastest, Virtually Painless
Hair Removal Laser

VIKINI

Fastest, Virtually Painless Hair Removal Laser

VIKINI is the most reliable diode laser system to virtually painless laser hair removal that has been clinically proved thru hundreds of global clinical site in various skin types. It has the optimum wavelength of 808nm and offers fast operation up to 10Hz and various selective pulse modes for the best hair removal solution in all skin types.

VARIOUS LASER PULSE MODES

VIKINI has 3 laser pulse modes of FDP, DP1 and DP2 that allow the practitioner to change the laser pulse modes from continuous to short, long, combined pulses or multi-pulse according to patient's skin and hair type for effective treatment result.

DP1 MODE 4 Laser Pulse

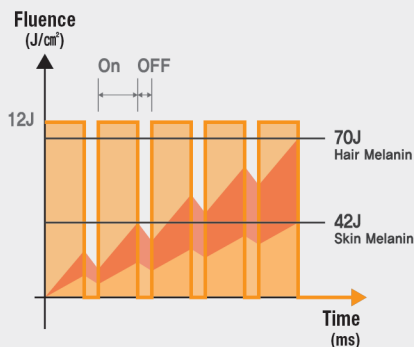

- Bright skin/thin hair
- Delivery strong output

- Dark skin/thick hair
- Twice longer pulse duration

- Sensitive skin
- 3 consecutive pulses

- Thin & thick mixed area
- Short & long pulse

DP2 MODE Intensive Multi-pulse Technique

- Pulsed Intense Light
- 42 degrees Celsius
- temperature needed to disable the follicles (70 degrees Celsius)

Up to
7
Counts

147J
Max Energy

Intensive hair removal for fine hair

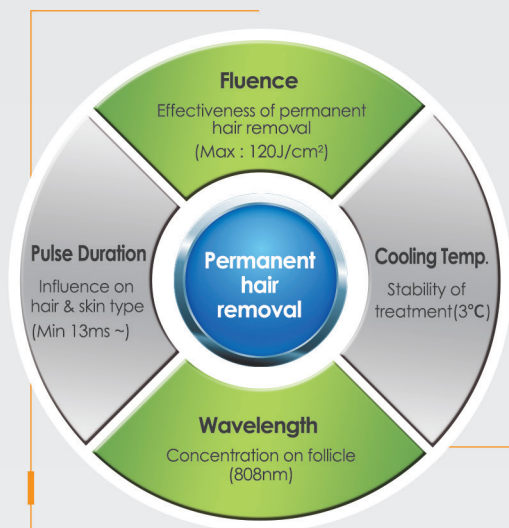

FDP MODE Quick Motion Technique

Up to
10 Hz

Fast
Treatment

Fastest hair removal for large areas
7mins for a full back | 2mins for armpit

- **12x11mm Spot Size**
- **Up to 10Hz Repetition Rate**
- **Stable & Uniform Beam Quality**
- **Powerful Contact Cooling**

TECHNOLOGY HIGHLIGHT

Exclusive collimation technology makes it possible to have far more stable and uniform beam quality thru decreasing energy loss and enables fast, safe and comfortable hair removal treatment in all skin types combining various pulse modes.

Safe and Effective

Its collimation optic is highly accurate in uniformly radiating laser wavelengths, resulting in more effective treatments through decreasing loss and scattering of laser light.

Virtually Painless

VIKINI has the powerful sapphire tip contact cooling system in order to minimize the thermal damage and make the treatment comfortable.

Ultrafast Speed

Its fast operation up to 10Hz with continuous pulse mode can treat a full back in less than seven minutes with safe and ultrafast speed.

Various Applications

Various laser pulse modes in a system offer safe and effective operation way to treat any type of hair and skin with less pain and much faster speed than any other lasers.

CLINICAL EVALUATION

Punit Saraogi, M.D., M.B.B.S., F.C.P.S
Skin & Hair Clinic Mumbai, India

“I use VIKINI 's FDP mode, basically making the treatment virtually painless and extremely well tolerated, even in more sensitive areas including the face, chin, knees and bikini lines.”

Dr. Adrian Lim
MBBS, FACP, FACD Dermatologist and Vein Specialist
Royal North Shore Hospital Republic Cosmetic
Dermatology and Vein, Australia

“The VIKINI has been a great addition to my practice because it is extremely effective. Clients notice the difference even with one treatment and refer other patients for laser hair removal.”

SPECIFICATION

Wavelength	808nm
Laser Type	CW Laser Diode
Laser Power	Max 600W
Energy Output	Up to 120 J/cm ²
Spot Size	12 * 11 mm
Pulse Duration	Up to 625ms
Pulse Repetition Rate	FDP : 5 ~10Hz / DP1: 1~3Hz / DP2 : 1~3Hz
Cooling	Sapphire Tip Cooling (3°C)
Optical Guide	Sapphire Crystal
Electrical Power	100~230VAC, 50/60Hz, 2.1KVA
